

cfg::options::get\_sleeps

```
graph LR; A[cfg::options::get_sleeps] --> B[tnct::lib::alg::program_options::get_set_param]
```

A diagram showing a call from the function `cfg::options::get_sleeps` to the function `tnct::lib::alg::program_options::get_set_param`. The first function is in a grey box, and the second is in a white box. A blue arrow points from the first box to the second.

tnct::lib::alg::program  
\_options::get\_set\_param
